

# Lipodrine Fat Burning Gel

## Benefits:

- Lipodrine (Sculpts) main active ingredient is Yohimbine HCL.
- Yohimbine binds to sites in your body called alpha-2 (A2) Receptors.
- Yohimbine is an Alpha-2 antagonist, which means that it blocks these A2 receptors sites.
- Sculpt delivers yohimbine to the site where it is applied.
- Wash your hands before and after use, apply to clean, hairless skin for optimal results.
- Exfoliate skin 2-3 times per week to maximize effects.

## Recommended use:

- 4 – 8 squirts rubbed onto problem area twice daily (preferably 8 – 12 hours apart).
- It's more effective to concentrate on one particular body part (e.g. midsection, thighs) for a few weeks and then going on to another body zone thereafter, rather than trying to do it all at once and spraying onto all different areas.

## WARNING:

Not safe for pregnant or breastfeeding women.

### Ingredients:

Yohimbine HCL

Octopamine HCL

N-ACETYL-L

Carnitine HCL

Caffeine HCL
